Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6, 8, and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Hayashi (6304538).

The claims merely read on supplying a reference clock to a Viterbi decoder during a reading operation. Thus any reference citing the use of a Viterbi decoder in a reading apparatus wherein a reference clock signal is generated read on the claimed invention.

The reference shows an optical disk reading apparatus having a clock source for supplying a signal to the decoder 12, 8, a clock control means for controlling the clock signal any element within element 7, a controller for controlling the reading operation (CPU), and the clock generation is only outputted during the reading operation because the reference does not use the decoding operation for a writing operation and only drawn to a reading operation.

With respect to the limitation of claim 2. see element 8.

With respect to the limitations of claims 3-6 see element 6.

With respect to the limitation of claim 8. the use of a magneto optical disk is merely an alternative medium equivalence to a CD, DVD...etc.

With respect to the limitation of claim 9 see element 108.

Art Unit: 2655

Claims 7, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows the limitations of the Viterbi decoder structural elements as claimed nor the use a clock control means as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6111846 and 5995465.
